PROJECT EXPERIENCE

Let's Go Eat — LaunchCode Liftoff

View at <http://letsgoeat-env.eba-dvfjnzns.us-east-2.elasticbeanstalk.com/>
Tech: Java, SpringBoot, MySQL, Hibernate, Thymeleaf Templates, APIs/JSON, Bootstrap

- Independently and completely built a web app that utilized the Yelp Fusion API, MySQL database and Java logic to recommend restaurants based on user input
- Users can create an account, log in, and log out
- Users can get a list of complete matches based on their input, or choose to view a random result
- Users can sort the table of results by each of the column headers
- In progress: users can add restaurants to a persistent list of favorites

Lefty Lettered — STLCC capstone project

Tech: HTML/CSS, JavaScript, PHP

URL: www.leftyletter.com

- Built a portfolio website, completely from scratch without using any templates or frameworks, that showcases my hand lettering services
- Used JavaScript for animations and PHP for contact form handling
- Launching the site resulted in 5 additional orders for hand lettering services
